Chemnitzer Mittagskreis e.V.

The “**Chemnitzer Mittagskreis**” is a private business Club, founded in 1992. Monthly meetings are used for socialising and exchanging actual information. The members, qualified individuals of the region, act private, unofficial and without political efforts.

We favour our region and the Town-partnership with Manchester, supporting young persons and entrepreneurs, to be former promoters, kinds of ambassadors, for our region. We try to encourage them to stay in the Chemnitz-area or come back to our region after their studies.

A bridge between regions in different foreign countries should be built on good knowing of each other and an intense relationship between individuals. Successful cooperation is based on these principles, more than on political unification or other facts in cross boarder business theories.

- **Contact our club**

- for contact to Chemnitz businessmen, the University and bilingual schools,
- to intensify the started relationships

The Emmerling-Dance Academy is amongst the largest 50 of approximately 2000 dancing schools in Germany.

We have 3000 weekly guests dancing in more than 150 courses covering a range from Hip Hop to Ballroom and Aerobics for elderly people. Besides the base in Chemnitz with it's 3 dancing rooms the school is using up to 10 extra dancing halls across the entire administrative region. The company which is a family business in the second generation is lead by it's owners Martina and Mirko Dreischarf who employ around 20 people.

The owners solidify the social, national, and international status of the facility by promoting the development of local, national and international networks with the realisation of all different kinds of events.

SLG-Ingenieurtechnik GmbH:

- independent provider of engineering service -

Besides developing and designing prototypes for technical tool-building, the domestic appliance industry and special-purpose machinery, the existing workshop equipment and a qualified workforce are able to produce parts, assemblies, right through to the making of complete special-purpose machinery, even at very short notice.

More complex technical services can be provided and implemented in cooperation with the network of regional partners.

Independent, qualified and skilled consulting and support services for quality management, environmentally-friendly operations and occupational safety successfully contribute towards the corporate development of a firm.

SLG is counting on innovative growth for the future and has a strong interest in forming co-operations with partners at home and abroad.

Preparing pupils and students for the challenges of the future requires a combination of solid scientific education, including all the new tendencies like biochemistry, biophysics and a lot more, and fundamental philosophical and societal studies that guarantee a critical distance and competent awareness, and logically – an experienced Multilanguage application.

The latter of which is the fundament of bilingual education based on English as the partner language. In 1992 it was established at the Georgius- Agricola- Gymnasium Chemnitz , a school being some 151 years old meanwhile.

Permanent teacher training and a solid affiliation with science and industry, associated with regular experience of English as a spoken language help enforce a high standard in teaching and advising students competently and professionally .

Moreover there is a lot of cooperation with schools in different European countries.

Additionally to the language programme, comprising English, Latin, Spanish and French, there are offers for Hebrew, Polish, Bulgarian, Russian, Hungarian and Chinese.

Gymnasium Chemnitz**

Prof. Dr. Wolfram Hardt

Chemnitz University of Technology

By receiving the spirit of globalisation enthusiastically, CUT has shown that it truly lives up to the tradition of innovation of the city of Chemnitz and its educational institutions. The university has adapted to market demands by introducing international degree courses and extended international student exchange programmes in order to satisfy the wishes of the growing international community.

Career prospects for Chemnitz graduates are among the best in Germany. The strong research profile of the university allows

students to work with up-to-date equipment and methods. In addition, strong links with companies such as Siemens, VW, BMW, AMD, Infineon, and banks like Commerzbank - all of which have major centres in the Chemnitz area - enhance future employment opportunities.

Eva Schulze Brockhausen

Engineering Services for Cement and Mineral Processing Industries

Brockhausen Engineering is a private company that supplies engineering, technical know-how and foundry products for cement and mineral processing industries.

The Brockhausen Engineering company is located in the city of Chemnitz near the "Erzgebirge". Chemnitz is a very old industrial city with a long tradition of foundry technology and mechanical engineering.

Our range of services and supplies includes single equipment as air separators, cement coolers and shaft dryers as well as complete turn key projects for grinding stations.
